

Bucket Lid with Agitator Pressure Tank

Stainless steel bucket lid with agitator

Fluid outlet
(Ø35mm)
(1.37in)

Fluid inlet
(Ø15mm)
(0.59in)

RB-TP

Air Motor	M10	M30
Motor power	1/16HP	1/4HP
Capacity	20(L)	
Blade size	Ø95mm (3.74 in)	
Axes size	Ø12x335mm (0.47x13.12 in)	
Dimension	380x350x225mm (14.96x13.78x8.86 in)	
Weight	5.1kg (11.24 lbs)	
Material	Stainless steel

Functional specification of automotive pressure tank

Functions and Characteristics (Small Amount Spray)

- ◆ The fluid liner bucket of RT-5E is made of SUS stainless steel.
- ◆ RC-2E and RT-2E are integrated molding of aluminum-alloy with anodize process on the surface, provide high safety performance.
- ◆ It is light weight and portable.
- ◆ **Warning: No to operate the pressure tank exceed the maximum pressure (0.3 Mpa). Prona Tools Inc will not hold any responsibility in case of accidents occur due to improper use of product.**
- ◆ **Do not use aluminum-corrosion material.**

Functions and Characteristics (Mass Amount Spray)

- ◆ Pressure tank is manufactured by integrated molding of pressure resistant steel plate. Its surface received special antirust treatment, provide high safety. Fluid feed can be siphoned from the top - suitable for normal fluid or drand at the bottom of the tank - suitable for high viscosity fluid. (subject to the size of the tank).
- ◆ The pressure tank can be classified into three types: with agitator, with manual agitator and pressure pot only.
- ◆ The pressure tank also equipped with an fluid liner bucket, which is made by SUS304 stainless steel (subject to the size of the tank).
- ◆ **Warning: Do not operate the pressure tank exceed the maximum pressure. Prona Tools Inc will not hold any responsibility in case of accidents occur due to improper use of product.**

Paint pressurized tank

Application NO: 2018 2 0637833. 2
